Ok, hope much of an increase in flow to the main stem north fork?

[REDACTED] 3:19 PM  
200cfs additional flows. Flows will be increased at Belden Dam in Caribou rd, and flow down through the North Fork of the Feather River. Main concern is the USFS campgrounds on caribou road. This is well with the capacity of the stream, it's just a precautionary concern for public that could be recreating

[REDACTED] 3:21 PM  
The reason for the flow increase is to support islanding (generation) through Caribou PH which is supporting all local generation load to Quincy and Lake Almanor area

[REDACTED] 3:23 PM  
Copy, both the USFS and CAL FIRE are aware and approve. I'm with them at the ICP. They will not be sending messaging out, but we can if you like. Confirming you will communicate this with [REDACTED]?

[REDACTED] 3:24 PM  
Copy, I will pass the info to [REDACTED]

[REDACTED] 3:25 PM  
Ok
